2019 marks two major milestones in the university’s history: the 50th anniversary of the matriculation of women in Yale College and the 150th anniversary of the first women students at the university who came to study at the School of Art when it opened in 1869. Find more about this year long commemoration at www.celebratewomen.yale.edu

Seven women received their PhDs from Yale in 1894, two years after the university opened its doors to women seeking graduate studies.

Many of you are already using this space; but for those who don’t know -- the first floor common room is now the designated study area in the house. Even if there is something going on in the basement common room, this silent study space will always be available.
